

TA and Art –

**Tone and Sound
Third time EATA presents
a special conference**

European Association for Transactional Analysis
TA and Art (2007, 2010, 2013)

Invitation to

**Conference 2013 in Berlin/Germany on 1st and 2nd of February
TA and Art – Tone and Sound**

The conference will be presented in the middle of Berlin, a very special place: Palais Podewil. Klosterstraße 68, D-10179 Berlin (Underground U- Bahn Klosterstrasse or S-Bahn Alexanderplatz). We have presenters on the conference and we have musicians for the concert before dinner, which we will have all together. We will present this conference together with the

**First European Association of Arts Therapies (FEAT) and the
German Association for Art and Music Therapy (BKMT)**

We want to build a bridge between TA and other art approaches, this time to music. So we are looking for workshops which will give the possibility to reflect about the connection between TA and Art.

Please feel invited to join the conference as participants as well as trainers. To take part in a conference where workshops and speeches are provided is always a very good experience and an intercultural exchange among the participants and trainers coming from different countries. The workshops in English and Italian will be translated so far, the main speeches will be translated into German. We do have a lot of participants who are able to speak English, perhaps everybody have to speak slowly in English. We expect also participants from England, Italy, The Netherlands, Poland etc. We will prepare all arrangement for about 80 to 100 participants and so you will have about 8 to 15 participants in the workshop.

The Presentations

Speeches and workshops
